

Editing listings in Homesnap

Listing agents can now edit some fields on their listings in the Homesnap app. The editable fields are limited to those that might be necessary for a quick update when you are away from your computer, such as status.

1. To access the edit screen for your listing, click the "Me" tab in the lower right-hand corner. Click "see all my listings," and then select the listing you want to edit.

2. When you're in the listing, click "Edit Listing" to access your edit options.

3. Select the type of change that you would like to make by clicking the arrow to the right of the change type. Enter the necessary information and save your change.

Change to Contingent CCS	>
Change to Accepting Backup Offers	>
Change to Pending	>
Change Expiration Date	>
Change Price	>
Change Remarks	>

Once you make the change to your listing, it may take up to 5 minutes for the changes to be reflected in the MLS and within the app.

If you have additional questions, please contact Customer Care at (866) 553-3430, seven days a week.
