

Making Your Syndication Selections

As the broker you have control over the websites to which your office's listings are syndicated. You can make these selections by going to Realcomp's corporate website. This is accessed by clicking the second icon on the login dashboard.

Once you are on the corporate website go to the upper right corner and select Links>DR/BROKER LINKS and then Listing Distribution.

From the Listing Distribution page, you can select which sites receive your office's listings by using the drop-down lists. The sites in the top section are defaulted to "No" until you select otherwise. The sites in the bottom section are ones in which the MLS has more control and are defaulted to "Yes" unless you choose otherwise. When a change is made to one item in a section, you must make a selection for all items in that section in order for the Save button to be available. Be sure to click Save in each section if you make changes.

Site/Service Name	Modify	Current Setting	Previous Setting	Reset Date
Homes.com	Select	Yes	Yes	04/16/2016
REALTOR.com	Select	Yes	Yes	04/16/2016
Zillow.com/Trulia.com	Select	Yes	Yes	04/16/2016

Update all brokerage offices with these settings

To save, you must select "Yes" or "No" for all sites/services. [Save](#) [Cancel](#)

Distribution to MLS-Related Services:
 These distribution options are provided by Realcomp to help you share your listings with consumers through Realcomp's public MLS search site, MoveInMichigan.com and with other cooperating REALTORS® through third party MLS data sharing platforms. Everyone is automatically OPTED IN by DEFAULT. To stop sending listings to a particular site, you will need to opt out of that site by selecting "No" from the drop-down menu for that site.

Site/Service Name	Modify	Current Settings
MoveInMichigan.com	Select	Yes
REALTORS® Property Resource (RPR)	Select	Yes
CoreLogic Data Co-op	Select	Yes
IDX (Internet Data Exchange)	Select	Yes

Note - IDX must be set to Yes in order for your office and agents to be eligible to have IDX web sites.
